

PHẠM VĂN A

FRESHER FRONTEND DEVELOPER

E-mail: xxxx@gmail.com

Phone: +84000000

Birth: 17/12/2000

Linkedin: linkedin.com/in/xxxx/

Address: xxxx/xx xxxx Street, Ward x, District x, Ho Chi Minh City

I work as the creative front-end Developer. I love to create polished and meaningful user experiences. Understanding of software engineering paradigms and frameworks for JavaScript. I'm ready to collaborate with new opportunities and challenges.

Overview

- Strengths: Front-end technology and a bit of Back-end web application development
- Proficiency in HTML, CSS, JavaScript
- Understanding of React.js and its core principles
- Experience with popular React.js workflows (Redux)
- Familiarity with newer specifications of EcmaScript (ES5, ES6)
- Have a design pattern knowledge base
- Familiarity with RESTful APIs
- Have experience in: JavaScript (ReactJS), MySQL, NoSQL, JSON, API
- Have experience in designing database and using structured query language
- Able to work with GIT
- Ability to learn and apply new technology quickly

Education

2018-2022	B.S. in Software Engineering, University of Science, Viet Nam National University.
GPA	3.2/4
Graduate Thesis	10/10
Foreign Language	VNU 176/400

Skills

Programming Languages	JavaScript, Typescript, Java, Python, C, C++, Csharp.
Frameworks/Libraries	ReactJS, ExpressJS, Tailwind, Redux, React Router.
Database	MongoDB, MySQL, ElasticSearch
Development Tools	Visual Studio Code, GIT, NPM, YARN
Others	Figma, Trello, HTML/CSS, SCSS, Firebase

Work experience

8/2020 – Present Collaborator, Teky Academy

Project

THEMOVIEDB – PERSONAL PROJECT

Mar 2023-Present

<https://github.com/phlonghcmus/themoviedb-clone>

Live: <https://themoviedb-phlonghcmus.netlify.app/>

A Website has UI similar themoviedb.org use TMDb API, login and signup with Firebase, Gmail – Use Axios to call API – Use useFormik, Yup to validate Form

ReactJS

HTML

SCSS

Firebase

TODOLIST – PERSONAL PROJECT

Mar 2023-Present

<https://github.com/phlonghcmus/todolist>

Live:

A list of tasks you need to complete or things that you want to do. Helping you not forget anything important.

Use Redux to manage state todos and filters.

ReactJS

HTML

Ant

Redux

Typescript

GRADE BOOK(CLASSROOM) - UNIVERSITY OF SCIENCE PROJECT

Jan 2022

Front-end Client: <https://github.com/WNC-Group-DHL/gradebook-client>

Front-end Admin: <https://github.com/WNC-Group-DHL/gradebook-admin>

Back-end: <https://github.com/WNC-Group-DHL/gradebook-service>

Design database system - Connect MySQL to CRUD class, student, teacher, grade - Authorize user , Login with Gmail -

Design api for application - Use nodemailer to send verification mail - Use library Mui Design to make UI faster

ReactJS

HTML

CSS

Mui

ExpressJS

MySQL

BOOK-STORE - UNIVERSITY OF SCIENCE PROJECT

Jan 2021

Client: <https://github.com/phlonghcmus/book-store>

Admin: <https://github.com/phlonghcmus/book-store-admin>

Design database system – Connect MongoDB to CRUD book, user – JWT authenticated user when login – Build application with MVC design pattern

Javascript

HTML

CSS

Handlebars

ExpressJS

MongoDB
